

## Advantages of the Reimer Mobile Concrete Mixer

### :: No waste

- unmixed product remains usable indefinitely
- 

### :: Long distance and remote deliveries

- concrete is always fresh
- 

### :: Cost effective "on site" concrete production

- no costly, time-consuming setups as with the batch plant, truck mixer system
  - continuous production is achieved when the Reimer Mobile Mixer is loaded with materials during the mixing/discharge operation
  - one Reimer Mobile Mixer can do the work of several truck mixers and a batch plant, increasing profits
- 

### :: Multiple short yardage deliveries

- metered yardage means that each delivery is accurately billed
- 

### :: Single person operation

- the Reimer Mobile Mixer is two machines in one, the mixer operator becomes the batch plant operator as well
  - accurate, easy to operate controls allows for different mix settings
- 

### :: Business flexibility

- one Reimer Mobile Mixer, a loader and a cement silo puts you in business. For maximum mobility, several material loading locations can be strategically located to minimize travel times
